

ARROYO[®]
craftsman

*Fine Lighting
Crafted in the American
Tradition*

2018

The Simple Life

The Arts and Crafts movement of the early 20th Century was a reaction to the design excesses and mass production of the Industrial Age. It emphasized design that was simple, hand-crafted and true to the nature of the materials from which it was made.

The creative influences of designers and artisans such as Frank Lloyd Wright, Elbert Hubbard, Charles and Henry Greene, Dirk Van Erp, Gustav Stickley and Louis Comfort Tiffany established this quintessential American art form. Harmoniously uniting organic architecture and hand-crafted furnishings this form encourages a simpler lifestyle and a return to basics.

Southern Californian artists and architects involved in this movement found special forms of inspiration and opportunity along the Arroyo Seco. An outgrowth of desire for a connection between nature and the creative process was The Arroyo Guild of Fellow Craftsman. The Arroyo Guild published a pamphlet entitled "Arroyo Craftsman" in 1909 that captured the community's collective imagination by championing man's innate need to create beautiful things with his own hands.

In the late 1980's, a Pasadena artisan, who had grown up surrounded by the "ultimate bungalows" of the Greene Brothers, believed that the time had come again to embrace the design and lifestyle promoted by the Arts and Crafts movement and created what became Arroyo Craftsman.

Arroyo Craftsman designs and manufactures fine architectural and landscape lighting that honors the traditions of elegant simplicity combined with quality craftsmanship established by the founders of the American Arts and Crafts movement. Our creative interpretations of this design aesthetic and strict attention to quality have made us the premier manufacturer of contemporary Arts and Crafts inspired lighting.

"Gradually the dweller in the simple home will come to ponder upon the meaning of art....it will then become apparent how truly the home is the real art center."

—Charles Keeler

What makes Arroyo Craftsman special?

Arroyo Craftsman is known for the myriad options it offers in glass and finishes and the scalability of its designs. Commercial grade quality and in house metalworking make us the choice for many institutional, commercial, and residential projects that require larger fixtures. Many historical registers have used either catalogued or custom product from Arroyo Craftsman.

We are capable of designing and creating custom fixtures for your project in a variety of sizes and styles, or modifying our current fixtures to suit your needs. Please contact your local lighting supplier or Arroyo Craftsman sales representative for information on how to order custom product.

Custom Capabilities

We pride ourselves on our attention to detail, hand finishing, and quality. Because of that, and a variety of choices in metal finish and glass combinations, we offer the finest quality and greatest selection in Arts and Crafts inspired lighting available.

The beauty of our product is more than skin deep. Our fixtures are made of heavier gauge brass than is common, giving them a more substantial appearance and increased durability. The rivets we use on many of our fixtures provide both beauty and additional structural integrity. Our glass panels are installed with both retaining clips and silicone to ensure that they are secured and will not rattle in the wind.

Our hand applied finishes are the best in the industry because we take the time to let them mature. The Mission Brown, Bronze, Raw Copper and Verdigris Patina undergo an intensive and time consuming process resulting in a complex and naturally aged appearance. All of our hand applied metal finishes will continue to mature and change with time.

Metal Finishes

Our hand applied finishes are the best in the industry because we take the time to let them "mature". Verdigris Patina, Raw Copper, Mission Brown and Bronze finishes are of an organic nature and are the result of an intensive three day oxidation process resulting in a complex and naturally aged appearance. Actual patterns and coloration of the metal finishes may vary from the images shown in this catalog, in fact may vary from product to product. This is due to the nature of the product and our hand-finishing. Our finishes will darken with age and weathering.

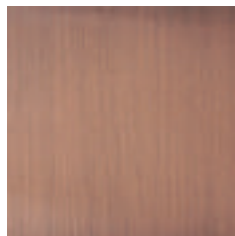

Powder coated finishes are durable and consistent.

Lacquer is a coating used on the following finishes: Antique Brass, Antique Copper, Bronze, & Verdigris Patina. Due to EPA standards we may only use a water based lacquer. This type of lacquer is less durable than a solvent based lacquer and will dissipate over time. This process will vary greatly depending on the environment. Periodically applying a wax on a lacquered surface will slow this process.

Oxidized Finishes

AB - Antique Brass

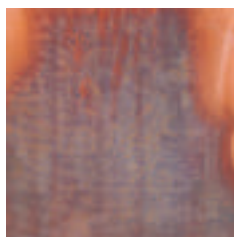

AC - Antique Copper

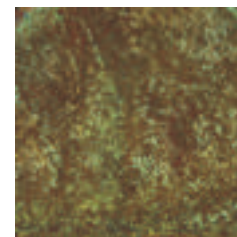

BZ - Bronze

MB - Mission Brown

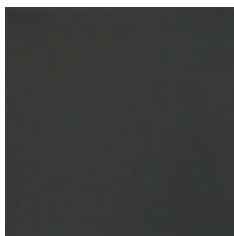

RC - Raw Copper

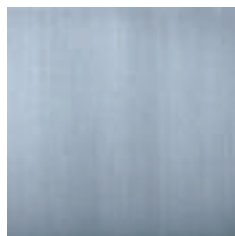

VP - Verdigris Patina

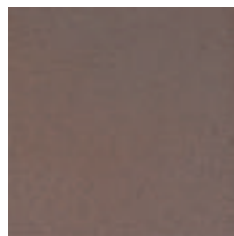

Powder Coated Finishes

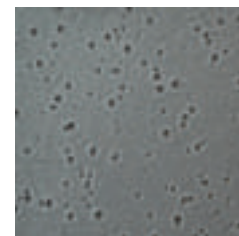

BK - Satin Black

P - Pewter

RB - Rustic Brown

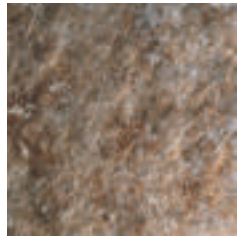

S - Slate

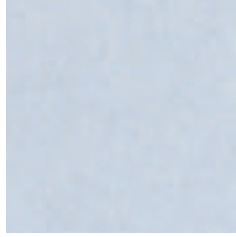

Glass Options

AE - Aerolite

*AM - Almond Mica

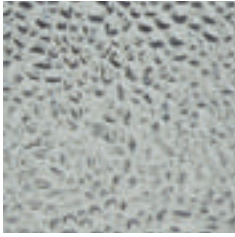

CLR - Clear

CR - Cream

CS - Clear Seedy

DD - Dew Drop

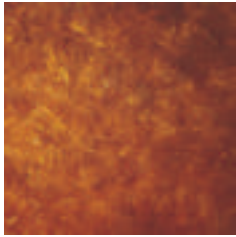

F - Frosted

FL - Flemish

GW - Gold White Iridescent

*M - Amber Mica

OF - Off White

RM - Rain Mist

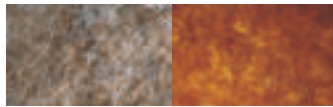

TN - Tan

WO - White Opalescent

Glass Shade Combinations

*MC - Almond Mica and Amber Mica combination

Offered in Ashville

***Mica is not recommended for outdoor use.**

GWC - Gold White Iridescent and White Opalescent combination

Offered in Etolile, Glasgow, Saint Clair

REC-Red and White Opalescent combination

Offered in Saint Clair

BC-Blue and White Opalescent Combination

Offered in Saint Clair

You are the Artist!

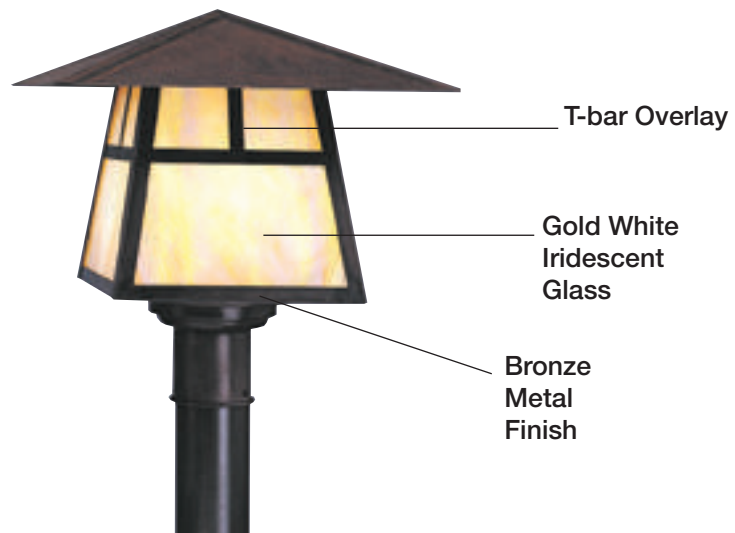

By offering several glass, finish, and scaling options within each thematic family, we allow you to design the product that specifically meets your aesthetic and functional needs.

Our product numbers are configured to let you choose the family style, application, size, decorative overlay (where applicable), glass/diffuser, and metal finish.

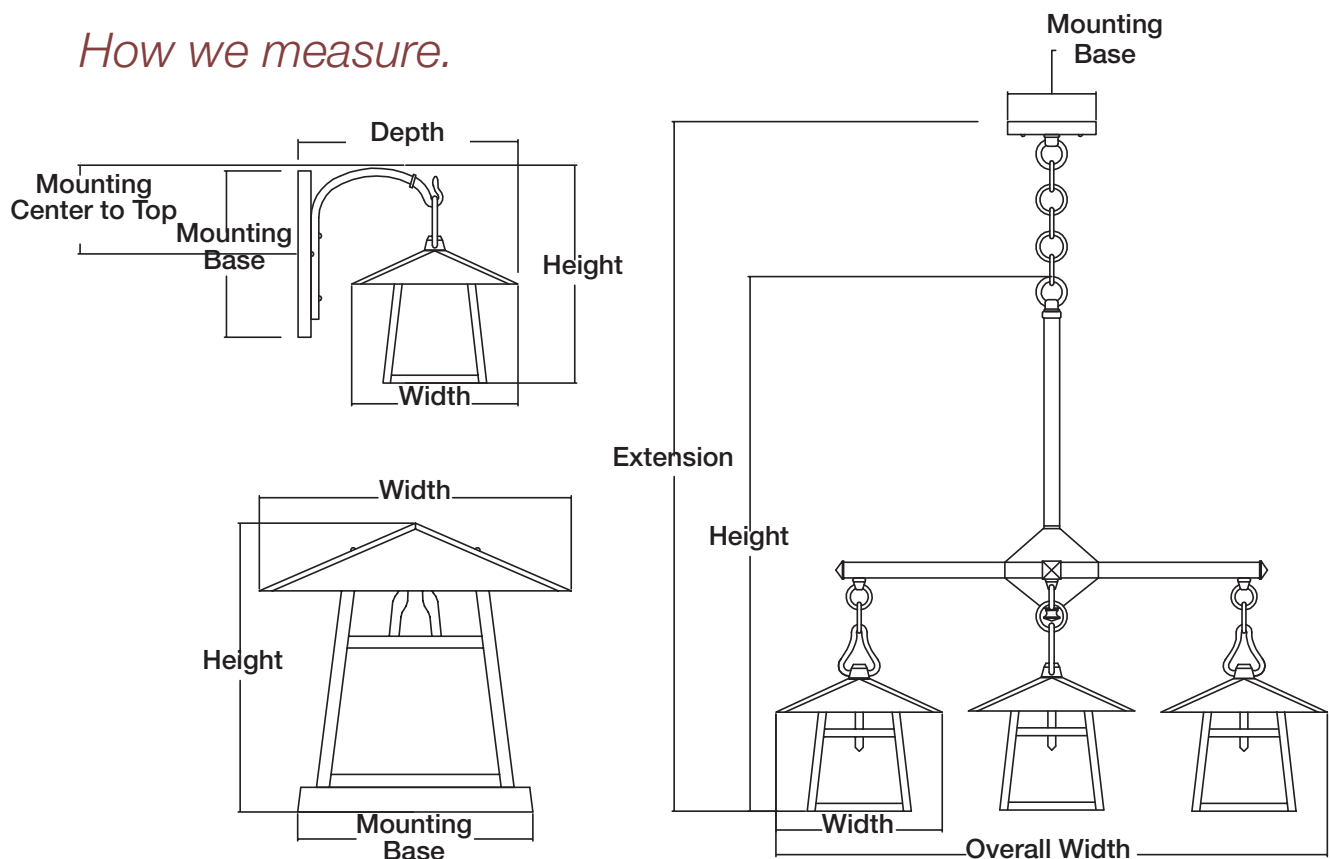

For example: the **CP-15TGW-BZ** is a combination of **C** (Carmel family), **P** (post mount), **15** (15 inch roof size), **T** (T-bar overlay), **GW** (gold white iridescent glass), **BZ** (bronze metal finish).

By organizing our product line and operations this way we empower you to become the artist that is inherent in all of us.

Carmel

The generous sloping roofs of these lamps are inspired by the classic architectural designs of the American Arts and Crafts movement of the early 1900's.

Evergreen

A subtle blend of Swiss Chalet, English Tudor and California Mission styles are skillfully married in this series with five choices of filigrees and decorative overlays.

PENDANT MOUNTING BASE

Glasgow

Inspired by the designs of C. R. Mackintosh, these Japanese influenced fixtures are at once contemporary yet traditional.

Prairie

The Prairie series honors the design principles of Gustav Stickley and Frank Lloyd Wright with clean geometric lines, exposed structural details and attention to quality. It features lamp bases of quarter-sawn oak evocative of the period.

Saint George

These Carpenter-Gothic inspired pieces emphasize a return to individual craftsmanship with the use of fanciful details such as steeply pitched roofs and lancet arches.

Product Information

Made in the U.S.A.: All Arroyo Craftsman fixtures are manufactured at our factory in Baldwin Park, CA.

Limited Warranty: All materials and component parts are warranted to be free from defects in materials and workmanship for a period of one year from date of purchase. The liability is expressly limited to the repair or replacement of such parts by Arroyo Craftsman, where in their opinion, damage is caused by defect and not misuse or incorrect installation.

Please note that free-hanging and some wall mount fixtures may not be suitable for high wind areas (options available). Arroyo Craftsman assumes no responsibility for improper selection or installation of its products.

No claims for labor or other charges at the job site will be allowed, unless specifically authorized in writing by Arroyo Craftsman. This warranty is automatically voided if any unauthorized repairs or alterations are made.

Voltage: Arroyo Craftsman fixtures with 110 line voltage are equipped with porcelain, medium or candelabra based sockets. Arroyo Craftsman fixtures wired for low voltage application require a 12 volt transformer; supplied by others.

TITLE 24/GREEN OPTION: All Arroyo Craftsman fixtures using a medium based socket may be specified with an optional GU24 based fluorescent socket for energy efficiency and Title 24 compliance.

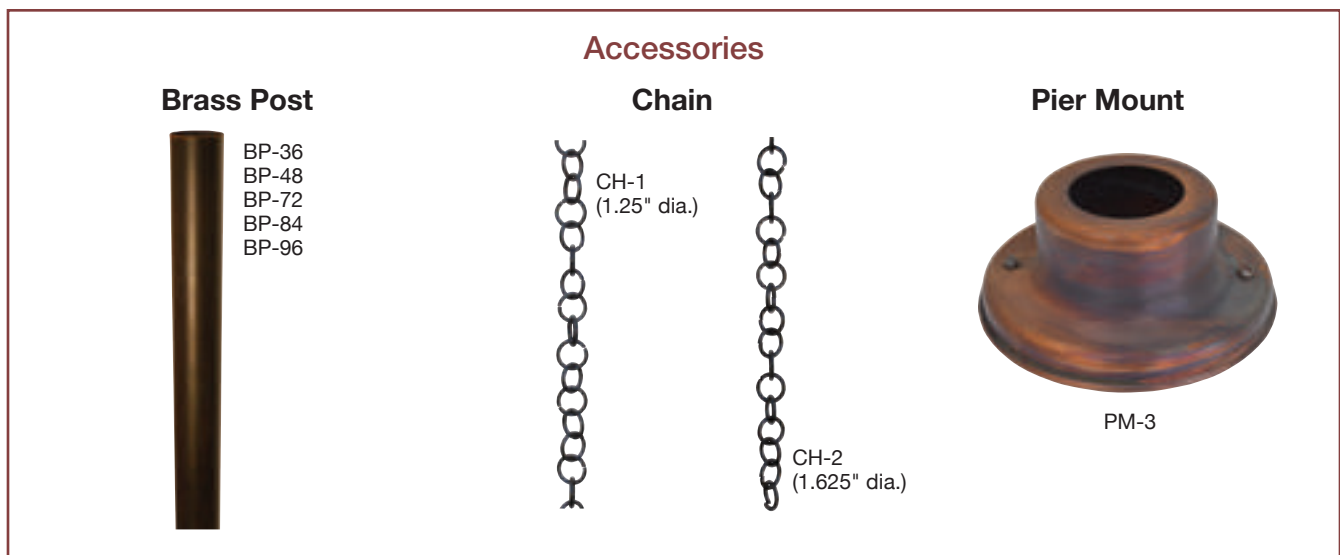

U.L. Listed: Underwriters Laboratories is a nationally recognized safety testing agency. Our fixtures conform to U.L. Standards, tested as required, and bear the U.L. listing mark. Fixtures can be supplied with C-U.L. mark for Canada.

Safety and Maintenance Warning: Line voltage fixtures in this catalog must be grounded in accordance with your local codes or the National Electric Code. Failure to take these steps may result in serious personal injury.

To maintain light efficiency and prevent excessive heat build-up, do not exceed the maximum wattage listed on each fixture.

Freight Damage: Our products are fragile and sometimes damage occurs despite our packing efforts. If you receive damaged merchandise, please immediately notify the distributor, the shipping company, and retain all packing materials. We will repair or replace as quickly as possible.

Product Care: The metal and glass components of Arroyo Craftsman products should be cleaned using warm water and a soft cloth. Please refrain from using soaps or glass cleaners as some of their ingredients may damage the metal finish. The raw copper and mission brown finishes are not lacquered and therefore are sensitive to the natural oils produced by the skin. Handling these finishes with exposed skin may affect the appearance, because of this we recommend using gloves when handling items in these finishes. Arroyo Craftsman's oxidized finishes will continue to change and mature with age. This process can be slowed, but not completely prevented, by applying a clear paste wax to the metal components of the item. We do not recommend using paste wax on raw copper or mission brown because it may damage the finish. Please feel free to contact us with further inquiries concerning the care of your Arroyo Craftsman product.
