

## COLUMN MOUNT

**CAUTION:** Turn off electricity at main electrical box BEFORE installation.

1. Remove Lantern roof and place base of lantern on column. Align Lantern to desired orientation. Mark hole locations of Lantern onto column. Drill holes for best method of securing Lantern to column. Lead anchor, etc., (not provided).
2. If column has outlet box, attach mounting strap to ears of outlet box.
3.
  - Connect the identified (ribbed) wire to the white (neutral) wire from the outlet box.
  - Connect the smooth wire to the black (hot) wire from the outlet box.
  - Connect GROUND wire of Lantern to GREEN screw on mounting strap in outlet box.
  - Use wire nuts and electrical tape to make all connections.
4. Place Lantern onto column, align the hole and secure Lantern to column.

**WARNING:** RISK OF FIRE. Most dwellings built before 1985 have wire rated 60 C. Consult a qualified electrician before installing.

**CAUTION:** Use light bulbs with wattages no greater than specified on fixture. Make sure electricity is off BEFORE installing light bulbs.
